### Features and Specifications

**Anti-UV Double Shades**:
Equipped with robust PC (polycarbonate) shades treated with anti-UV powder to prevent yellowing and ensure long-lasting clarity.
The double-layered design diffuses light softly and eliminates glare, offering superior comfort compare traditional glass materials.

**Electrical**
Wide Voltage & Dimming Compatibility Supports AC100-277V input with 0-10V dimming capability and phase dimming option , providing flexibility for a range of lighting systems and energy-saving control.

**CCT :**
5CCT Tunable Light Easily switch between five color temperatures (2200K / 2700K / 3000K / 4000K / 5000K) to suit different moods, settings, and applications.

**Construction**:
Crafted with a die-cast aluminum waterproof housing and steel backplate for maximum strength and durability in harsh outdoor environments.

**Appearance** :
A sleek, high-quality appearance with a modern silhouette enhances architectural aesthetics while providing reliable illumination.

**Environment**:
With an IP65 rating, this fixture is fully protected against rain, snow, and dust – ideal for all-weather outdoor use.

**Finish**:
Coated with anti-rust and anti-corrosion powder paint to maintain its original color and finish even after years of exposure.

**Certificate** :
ETL and cETL listed, meeting U.S. and Canadian electrical safety standards for dependable and secure operation.

**Installation**:
Designed to fit a standard 4" U.S. junction box, allowing for quick and straightforward setup.

**Applications**:
Perfect for enhancing the look and security of outdoor spaces such as gardens, patios, balconies, corridors, walkways, villas, and entry pillars
